<b>Office Action Summary</b>	<b>Application No.</b> 10/581,259	<b>Applicant(s)</b> GIBERTINI, MICHAEL	
	<b>Examiner</b> San-ming Hui	<b>Art Unit</b> 1617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

Claims 1-5 are pending.

### ***Claim Objections***

Claims 2-3 are objected to because of the following informalities: the use of parenthesis in claim 2, line 2 and claim 3, line 2: “(hypoactive)”, is considered improper. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,545,755 ('755), US 4,640,921 ('921) in view of Rehman et al. from the IDS filed 8/31/2006.

'755 teaches 5HT-1A agonists as useful in treating sexual dysfunction (see col. 1, lines 53-54). '755 also teaches that gepirone as a 5HT-1A agonist (See col. 1).

'921 teaches buspirone, another 5HT-1A agonist, useful in normalizing hyposexual dysfunction including female sexual dysfunction (See col. 3, lines 7-63).

Both the primary references do not expressly teach the use of gepirone in a method of treating sexual dysfunction such as arousal disorder and hypoactive sexual desire disorder.

Rehman et al. teaches 5Ht-1A agonists such as buspirone and gepirone as effective in modulating sexual behavior (see the abstract).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ gepirone in a method of treating sexual dysfunction such as arousal disorder and hypoactive sexual desire disorder in both male and female.

One of ordinary skill in the art would have been motivated to employ gepirone in a method of treating sexual dysfunction such as arousal disorder and hypoactive sexual desire disorder in both male and female. It is known that 5HT-1A agonists such as buspirone and the compounds of '755 as useful in treating sexual dysfunction and normalizing hyposexuality. Therefore, employing any known 5Ht-1A agonists such as buspirone and gepirone in a method of treating arousal disorder and hypoactive sexual desire disorder would be reasonably expected to be effective.

No claims are allowed.
